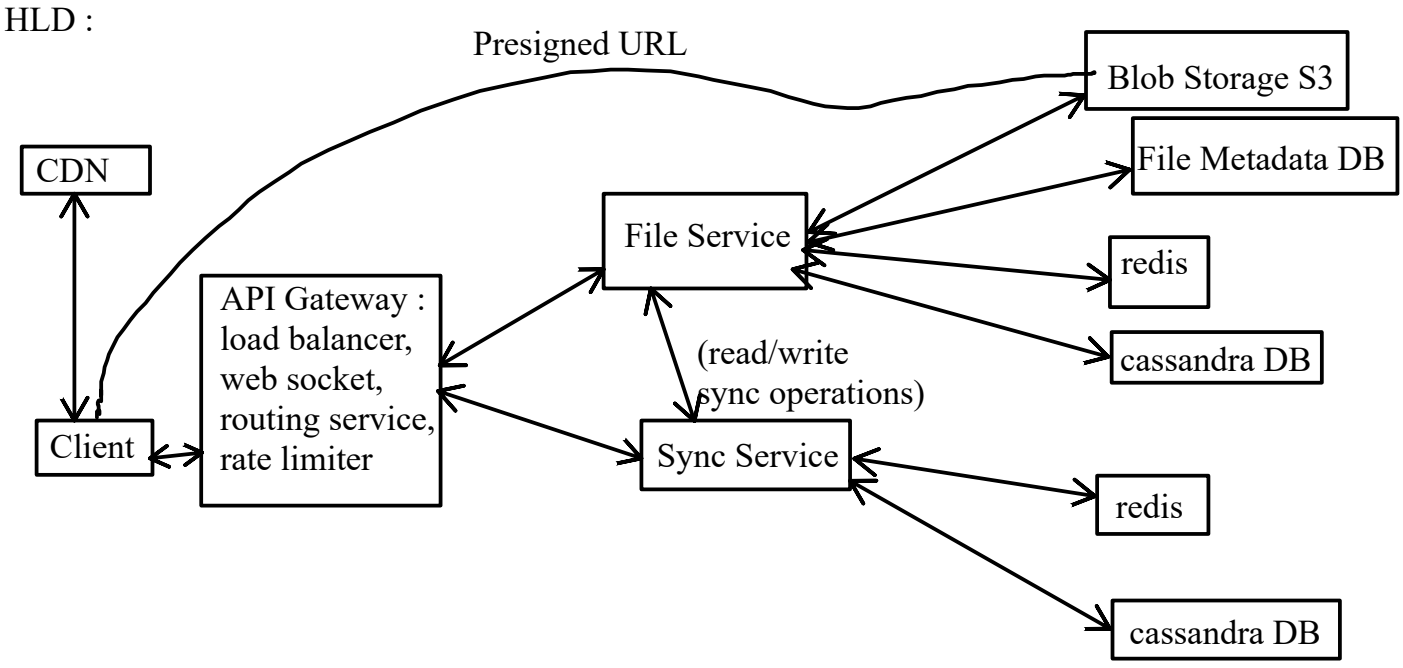
DropBox :

Functional requirements:
user should be able to upload any file based on his preference,
user should be able to search for any file based on his preference,
upload/download should get sync-up

Non-functional requirements:
Data-partitioning,
load balancing,
fault tolerance,
vertical scalability,
horizontal scalability,
low latency,
high throughput,
CAP (Here eventual consistency is fine , but here we need 99.99% uptime i.e Availability>>Consistency)

Core Entities:
user,
file,
history,
uploads

API :
POST:/upload/file
{
userID,
{filemetadata}
}

GET:/search/{fileID}


HLD :
