

Twitter :

functional requirements:

User should be able to upload any media (Image/videos/pdf) based on his preference,

user should be able to search for any post based on his preference,

user should be able to like/comment/share any post based on his preference,

Non-functional requirements:

data-partitioning,

load balancing ,

fault tolerance.

vertical scalability,

horizontal scalability,

low latency,

high throughput,

CAP theorem (Here eventual consistency fine , but here we need to prioritise 99.99% uptime

i.e Availability>>Consistency)

Core Entities:

user,

post,

feed,

API:

POST:/upload/post

{

userID,

filemetadata

}

GET:/search/{postID}

HLD:
